Description

These lightweight aluminum approach ramps weigh only 18 lbs each, compared to the 53 lbs of standard ramps. The aluminum approach ramps are designed to work with the TITAN SDPL-7000 and the SDPL-7000XLT 4-post automotive lifts. These ramps are made from lightweight aluminum, with welded gussets for extra support. They are able to be moved with ease, while still maintaining a solid structure. The attachment lips of the ramps can be easily modified to allow them to be used with most any brand of 4-post lift.
